**Early Buzz from the Blogs**

Reviewers and users love the faster speeds, sharper graphics and handy shortcuts. Here's some of what they have to say:

"Parallels Desktop, many a Mac-user's go to solution for getting Windows on their Apple machine, just announced version 6.0, increasing support for 3D games and applications, enabling the same shortcuts work across operating systems, and making things snappier all around."  
- Kyle Vanillemer, Gizmodo, 10 Sept 2010

"There's already a number of options available to virtually run Windows applications on your iPhone or iPad... but users of the recently released Parallels Desktop 6 for Mac now have what looks to be a particularly seamless option at their disposal."  
- Donal Melanson, Engadget, 17 Sept 2010

\*from reviews published by Engadget, CNET, Gizmodo

**Simply** The faster, smarter and more powerful way to run Windows applications on a Mac.
